

# UTStarcom Services

...Support without Boundaries

## Installation Services

### DEPLOYMENT

#### KEY BENEFITS

- **Accelerate time-to-market for services roll out**

Our installation services use proven industry methodologies that save both time and money. Beat your competition with speedy and cost-effective network installation.

- **Meet aggressive project timelines**

We are committed to meeting even the most challenging project timelines. Our teams work dedicatedly with you and for you to ensure project completion within time and budget.

- **Reduce total cost of ownership (TCO) by completing projects on time and within budget**

TCO goes beyond the purchase of the product—and it starts with a high quality installation

UTStarcom Installation Services address the challenges associated with accurate and efficient installation of your network infrastructure. Consistent with UTStarcom's "Think Global, Act Local" professional services strategy, our regional technical teams manage and work with UTStarcom's global network of local installation partners to meet your aggressive deployment schedules. With thorough pre-planning that anticipates possible installation challenges, UTStarcom engineers will help you complete your projects on time and within budget. Our services team manages complete installation, testing and commissioning of your network ensuring accelerated time-to-market.

Guided by a detailed statement of work (SOW), we tailor these solutions to suit your schedule and budget with our "first time, on time and every time" approach.

UTStarcom offers you a wide variety of end-to-end installation capabilities:

- **Pre-site preparation for network installation and implementation**
- **Engineering, furnishing and installation services for networks**
- **Testing and commissioning for networks**

You can also ensure that all aspects of your network operations are fully functional and ready for initial deployment—and future growth. Using the latest tools and techniques, our team of skilled network professionals works closely with you to ensure best practices are applied to all phases of your operational plans.

#### DELIVERABLES

Key Deliverables	Description
Project Plan	UTStarcom will prepare a comprehensive project plan detailing all work to be performed.
Site Readiness	Includes all activities required to prepare the target site for installation of the UTStarcom system.
Delivery & Installation	Includes but is not limited to inventory management, cabling, chassis and rack mounting, power and testing.
Configuration, Test and Acceptance	UTStarcom will verify your system configuration then test all features and functions required to meet final acceptance.

Our network installation services focus on meeting your business and infrastructure needs by implementing stable, scalable and efficient networks. UTStarcom can become your business partner, with a proven track record in providing quality network installation services. We specialize in offering total network installation solutions to the global telecom networks market.
